PROFILE SUMMARY

Aspiring Software Engineer with strong foundations in Data Structures, OOPs, and backend development. Experienced in building secure REST APIs using Node.js, Express, and SQL/NoSQL databases. Passionate about solving real-world problems through scalable system design and clean code in fast-paced environments

TECHNICAL SKILLS

Languages & Frameworks: Java, HTML5, CSS3, React.js, Node.js, Express.js, FastAPI

Databases & Core CS: MongoDB, MySQL, Redis, SDLC, Data Structures and Algorithms, OOPs

Backend & Security: REST APIs, JWT Authentication, RBAC, System Design, Microservices

Tools: Git, GitHub, Docker, Postman, CI/CD Pipelines, VS Code

PROJECTS

AI-Scalable URL Shortener | *MERN, Redis, Docker, FastAPI* | [GitHub](#) **Jan 2026**

- Architected a scalable URL shortener using **Node.js**, **Express.js**, and **React.js** with a **6-microservice architecture**, containerized via **Docker Compose**
- Implemented **Redis** caching with **iredis** and 1-hour TTL, reducing redirect latency by **40–50%** and minimizing redundant **MongoDB** queries
- Integrated a **FastAPI-based microservice** with a Random Forest model trained on a labeled URL dataset, achieving **85–90% classification accuracy** during testing
- Integrated comprehensive API security layers, including **Helmet**, **rate limiting**, and **input sanitization**, preventing **70–80%** of unauthorized data access and reinforcing user trust

WebHome | *Node.js, Express.js, MongoDB, EJS, CSS, JavaScript* | [GitHub](#) **Jun 2025**

- Engineered a full-stack property rental platform using **Passport.js authentication** and Express session management
- Automated booking workflows with validation and conflict detection, reducing manual processing by **35%**
- Designed and validated **10+ RESTful APIs** using **Postman** with multiple test cases, ensuring endpoint reliability and consistent data handling
- Integrated **Cloudinary CDN** for media storage, improving image load speed by **40%** and enabling lazy loading

QuickBite | *MERN, Stripe API* | [GitHub](#) **Feb 2025**

- Built a food ordering platform with **JWT-based authentication** and secure token handling, reducing manual order processing by **45%** and minimizing unauthorized access risks
- Designed **role-based dashboards** for customers and admins, supporting **2 user roles** and improving workflow
- Integrated **Stripe** payment gateway with **webhook**, enabling secure and seamless real-time transactions
- Optimized **MongoDB queries** using indexing, improving query execution time by **30%** during testing

CERTIFICATIONS AND ACHIEVEMENTS

- IBM Blockchain Developer [Link](#)
- IBM GEN AI Using IBM Watsonx [Link](#)
- Successfully solved **150+ problems** on **LeetCode**, earning **monthly consistency badge** and master data structure and algorithms
- Core member of Edu4U Club, supported team members in organizing activities and events
- Represented college in 5+ inter-college cricket tournaments, developing teamwork and collaboration

EDUCATION

Vellore Institute of Technology

Bachelor's in CSE Specialization in Artificial Intelligence & Machine learning

Nov. 2022 – Nov. 2026

CGPA : 8.04

Maheshwari Public School

Higher Secondary Certificate (HSC)

2020-2021

Percentage: 76.6%
